PAINT ROLLERS

How to choose the right paint roller?

When it comes to selecting the right paint roller, there are several factors to consider in order to achieve the desired result:

SURFACE TYPE:

Different types of surfaces require appropriate paint rollers to achieve the optimal result. Based on the type of surface the paint is applied to, we have categorized the paint rollers into: rollers for smooth surfaces, semi-rough surfaces, and rough/exterior surfaces.

FLAT SURFACES
SEMI-ROUGH SURFACES
ROUGH SURFACES

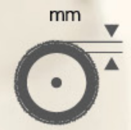
TYPE OF PAINT:

We have classified the paint rollers based on the type of paint being applied. This classification allows for the selection of the right paint roller for a specific type of paint and the surface being painted, which is essential for achieving excellent results during the painting process.

PAINT ROLLERS FOR DISPERSIVE (EMULSION) PAINTS
PAINT ROLLERS FOR ACRYLIC & LATEX PAINTS
PAINT ROLLERS FOR SPECIAL COATINGS
PAINT ROLLERS FOR STAIN AND VARNISH
PAINT ROLLERS FOR FACADE PAINTS

TYPE OF MATERIAL:

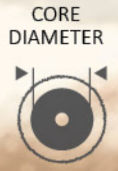
The type and quality of materials used to make the fabrics, as well as fabrics length and fiber structure directly impact the quality and final result of the work. Longer fibers are ideal for rough and semi-smooth surfaces, while shorter fibers are suitable for fine finishes, glazes, and varnishes.

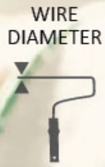


POLYAMIDE
MICROFIBER
ACRYLIC
NYLON
WOOL

PAINT ROLLER SIZE:

An important factor in selecting a paint roller is the length of the paint roller and the diameter of the core. For larger surfaces, it is recommended to use longer paint rollers with a larger diameter, while for smaller areas, corners, and hard-to-reach places, paint rollers with a core diameter of 15 mm and a length of 10 or 7 cm are recommended.





PAINT ROLLER MANUFACTURING METHODS:

THERMOFUSION PAINT ROLLERS have short fibers at the ends that follow the center line, which almost completely eliminates the possibility of accidental color transfer to the neighboring wall and ensures precision in the finishing work.

SEWN PAINT ROLLERS contain a special foam that makes the rollers soft and suitable for excellent adherence to rought/exterior surfaces and ensuring high quality, efficient work

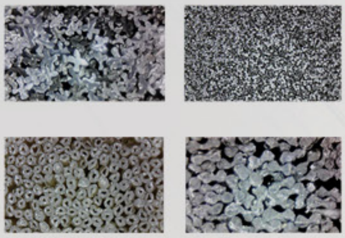
PAINT BRUSHES

How to choose the right paint brush?

When it comes to selecting the right paint brush, there are several factors to consider in order to achieve the desired result.

BRISTLE TYPE:

The bristles in brushes vary in microscopic cross-section shape, structure, tip treatment, thickness, flexibility, durability and the type of material they are made from. The combination of fila- ments in each bristle ensures the otimal choice for a specific purpose of the paint brush.



PURPOSE DEPENDING ON THE PAINT TYPE:

The correct selectioon of the appropriate bristle and filament mix directly determines the purpose of each paint brush, as well as the type of paint being applied, which affects the coating quality and ease of work. Based on this, we have developed a range of paint brushes specially designed for different types of paint: acrylic and latex paints, glazes, wood paints, and paints for metal surfaces.

UNIVERSAL PAINT BRUSHES
PAINT BRUSHES FOR ACRYLIC PAINTS
PAINT BRUSHES FOR WOODEN SURFACES
PAINT BRUSHES FOR METAL SURFACES
PAINT BRUSHES FOR DECORATIVE WORKS

QUALITY LEVEL:

Quality level is an important factor when choosing the right paint brush. We have classified our paint brushes into three quality levels: hobby, standard, and expert. Each of these levels is tailored to the specific needs and requirements of the user.

HOBBY STANDARD EXPERT

PURPOSE DEPENDING ON THE SURFACE:

Depending on the surface being painted, accessibility, and the type of paint being applied, we have curated a range of specialized paint brushes. This range includes pint brushes for painting parquet, paint brushes for hard-to-reach surfaces, as well as different types of brushes such as tappers, chip brushes, and stippling brushes.

ADHESIVE TAPES

How to choose the right adhesive tape?

When it comes to choosing the right adhesive tape, it is important to consider the specific requirements of the project you are working on.

ADHESIVE TAPE APPLICATION:

Masking tapes are used for both outdoor and indoor work. An important factor is the duration for which the tape remains adhered, meaning the time frame in which the tape can be removed from the surface without leaving any adhesive residue or tape marks.

UNIVERSAL APPLICATION
OUTDOOR APPLICATION
INDOOR APPLICATION

SURFACE TYPE:

The purpose of the adhesive tape also depends on the type of work and the surfaces it is applied to. We have divided the tapes into universal tapes, wall and ceiling tapes, facade tapes, door and window protection tapes, and decorative work tapes.

UNIVERSAL TAPES
WALL AND CEILING TAPES
FACADE TAPES
DOOR AND WINDOW PROTECTION TAPES
TAPES FOR DECORATIVE WORKS

ADHESIVE STRENGTH:

If the tape is applied to uneven surfaces, a stronger adhesive strength is preferred. For more delicate surfaces, the adhesive strength should be weaker.

TEMPERATURE RESISTANCE:

Working environment conditions are also a very important aspect when choosing the right tape. Tapes with higher temperature resistance and UV/Water resistance are used for outdoor work and can withstand various weather conditions. Tapes with lower temperature resistance and no UV/Water resistance are mostly adequate for indoor tasks.

STRONG185016	18mm	50m	piece	16 pcs	96 pcs
STRONG245012	24mm	50m	piece	12 pcs	72 pcs
STRONG305010	30mm	50m	piece	10 pcs	60 pcs
STRONG36508	36mm	50m	piece	8 pcs	48 pcs
STRONG48506	48mm	50m	piece	6 pcs	36 pcs

LABEL

- Masking tape for external and internal use, intended for jobs where strong adhesion is required, professional quality level
- Tape thickness: 145 ± 10 μm
- Recommended removal time: 5 days
- Surfaces: Wood, metal, glass, concrete
- Resistance to high temperatures and atmospheric influences
- Glue: Natural rubber
- Adhesive strength: 4
- Material: Crepe paper
- Temperature resistance: 80/60 °C/min
- Color: Yellow

DOUBLE SIDED TAPE

Code	↕	↔	Unit	Pack unit	Master carton
DT18X5	18mm	5m	piece	16 pcs	192 pcs
DT38X10	38mm	10m	piece	96 pcs	96 pcs
DT5	48mm	5m	piece	3 pcs	72 pcs
DT50X10	48mm	10m	piece	72 pcs	72 pcs

LABEL

- Double-sided adhesive tape for connecting, mounting and fixing objects made of various types of materials
- For internal use
- It remains on the surface for a long period of time
- Tape thickness: 105 ± 10 μm
- Surfaces: Textile, vinyl, wood, plastic
- Color of the adhesive part of the tape: White
- Color: Yellow

OTHER TAPES

PACKING TAPE BROWN

Code			Unit	Pack unit	Master carton
MT50X50	50mm	50m	piece	6 pcs	72 pcs

LABEL

- Polypropylene self-adhesive tape for taping light and medium weight packages
- Does not leave traces of glue
- Tape thickness: 43 µm
- Surfaces: Cardboard, paper, plastic
- Glue: Acrylic glue
- Material: BOPP
- Color: Brown

PACKING TAPE TRANSPARENT

Code			Unit	Pack unit	Master carton
S50X50	50mm	50m	piece	6 pcs	72 pcs

LABEL

- Polypropylene self-adhesive tape
- For sealing light and medium-weight packages
- No adhesive residue
- Tape thickness: 43 µm
- Surfaces: Cardboard, paper, plastic
- Adhesive: Acrylic adhesive
- Material: BOPP
- Color: Transparent

ALUMINIUM TAPE

Code			Unit	Pack unit	Master carton
AT10	48mm	10m	piece	72 pcs	72 pcs
AT50	48mm	50m	piece	36 pcs	36 pcs

LABEL

- Single-sided adhesive tape with aluminum backing
- For joining pipes in ventilation and heating systems, insulating electromagnetic devices, and protection against high temperatures
- Water- and corrosion-resistant
- Temperature resistance: From -20 °C to 120 °C
- Tape thickness: 48 ± 10 µm
- Adhesive: Acrylic adhesive
- Material: Aluminum foil
- Color: Gray

DUCT TAPE

TT	48mm	10m	piece	72 pcs	72 pcs
TT20	48mm	20m	piece	10 pcs	20 pcs
TT50	48mm	50m	piece	36 pcs	36 pcs

LABEL

- Three-layer, fabric-reinforced polyethylene adhesive tape
- With exceptional adhesive strength and versatile applications
- Application: Suitable for a wide range of uses, e.g. for coating in thermal and moisture protection, packaging heavy parcels, repairs, and decoration
- Adhesion: Adheres well to various surfaces, holds bonded parts firmly, and is highly moisture-resistant
- Tape thickness: 140 ± 10 µm
- Surfaces: paper, wood, concrete, metal, fabric, plastic, brickStoff, Kunststoff, Ziegel
- Adhesive: Hot melt
- Material: Polyethylene, reinforced with fabric
- Color: Gray

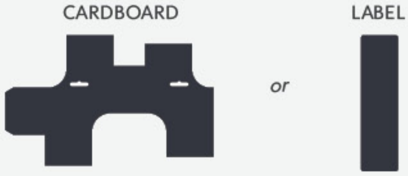
ULTRA RESISTANT DUCT TAPE GRAY

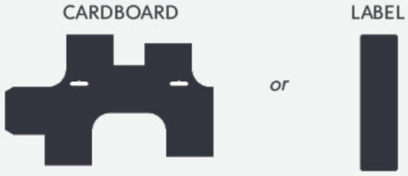
Code			Unit	Pack unit	Master carton
TTUOS20	48mm	20m	piece	10 pcs	20 pcs



- Product description: Extremely durable repair adhesive tape for heavy-duty repairs on all surfaces, resistant to weather and extreme conditions
- Application: This adhesive tape is suitable for repair work where extreme adhesion strength, wear resistance, and weather resistance are essential. Thanks to its excellent adhesion and durability properties, it ensures a long-lasting, heavy-duty bond that is weather-resistant and UV-resistant. It is therefore ideal for repairs on all smooth and rough surfaces. It is used for repairing and sealing cracks, joining and sealing broken parts, or bundling items
- Instructions for use: The surface to be treated must be clean, dry, and free of dust and grease. Avoid touching the exposed adhesive surface to maintain full adhesive strength. For optimal adhesion, firm hand pressure is recommended during application
- Tape thickness: 220 ± 10 µm
- Surfaces: Paper, wood, concrete, metal, fabric, plastic, brick
- Adhesive: Hot melt
- Material: Polyethylene, reinforced with fabric
- Color: Gray

ULTRA RESISTANT DUCT TAPE BLACK

Code			Unit	Pack unit	Master carton
TTUOC20	48mm	20m	piece	10 pcs	20 pcs



- Product description: Extremely durable repair adhesive tape for heavy-duty repairs on all surfaces, resistant to weather and extreme conditions
- Application: This adhesive tape is suitable for repair work where extreme adhesion strength, wear resistance, and weather resistance are essential. REPAIR TAPE TRANSPARENT

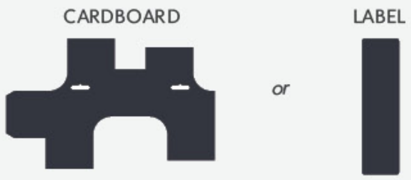
Code			Unit	Pack unit	Master carton
RTP20	48mm	20m	piece	10 pcs	20 pcs



- Product description: Transparent repair adhesive tape for fixing transparent items such as glass, plastic, or film
- Application: For sealing broken or punctured surfaces where transparency and weather resistance are essential. Suitable for repairing glass surfaces (windows, furniture, headlights, tail lights, windshields) as well as plastic greenhouse coverings
- Instructions for use: The surface to be treated must be clean, dry, and free of dust and grease. To maintain full adhesive strength, avoid touching the exposed adhesive surface. The adhesive must be applied with maximum pressure to achieve optimal bonding. Recommended application temperature: between 0 °C and +35 °C. The specified performance is achieved after a curing time of 24 hours at an optimal temperature of 23 °C
- Tape thickness: 150 ± 5 µm
- Surfaces: Glass, plastic, or film
- Adhesive: Water-based acrylic
- Material: LDPE film
- Color: Transparent

DOUBLE SIDED NANO MOUNTING TAPE

CARDBOARD

Code	↕	↔	Unit	Pack unit	Master carton
DNT1.5	19mm	1.5m	piece	12 pcs	48 pcs

- Product description: Strong, double-sided, transparent mounting adhesive tape for fixing items on smooth and slightly rough surfaces
- Application: For secure and permanent mounting of objects and decorations under all conditions where water resistance is important or a transparent bond is required. Suitable for use on smooth and semi-smooth surfaces
- Instructions for use: The surface to be treated must be clean, dry, and free of grease, oil, moisture, dirt, and other contaminants before application
- Tape thickness: 2000 ± 10 μm
- Surfaces: Plastic, metal, ceramic, glass, and wood surfaces
- Adhesive: Acrylic
- Material: PE release liner
- Color: Transparent

DOUBLE SIDED UNIVERSAL MOUNTIUNG TAPE

CARDBOARD

Code	↕	↔	Unit	Pack unit	Master carton
DFUT2	19mm	2m	piece	12 pcs	48 pcs

- Product description: Universal double-sided mounting adhesive tape for fixing objects on smooth and slightly rough surfaces
- Application: For mounting lightweight items or decorations on smooth and slightly rough surfaces. Suitable for indoor use
- Instructions for use: The surfaces to which the tape is applied must be clean, dry, and free of grease, oil, moisture, dirt, and other contaminants
- Tape thickness: 1000 ± 10 μm
- Surfaces: Plastic, metal, ceramic, glass, and wood surfaces
- Adhesive: Acrylic
- Material: PE release liner
- Color: White

DOUBLE SIDED ULTRA STRONG MOUNTIUNG TAPE

CARDBOARD

Code	↕	↔	Unit	Pack unit	Master carton
DFUJT2	19mm	2m	piece	12 pcs	48 pcs

- Product Description: Strong double-sided mounting tape for attaching objects to smooth and slightly rough surfaces
- Application: For attaching solid objects and decorations where strong adhesion is required. Suitable for indoor use on smooth and slightly rough surfaces
- Application Instructions: The surface to be treated must be clean, dry, and free of grease, oil, moisture, dirt, and other contaminants before application
- Tape Thickness: 1000 ± 10 μm
- Suitable Surfaces: Plastic, metal, ceramic, glass, and wood
- Adhesive: Acrylic
- Material: PE Release Film
- Color: White

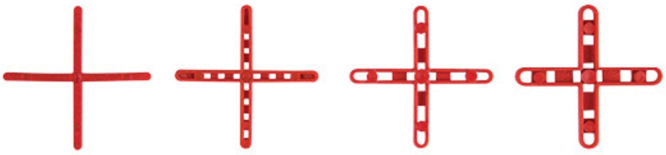
TOOLS FOR TILE INSTALLASTION

TILE CROSSES



Code	Width	Length	Unit	Pack unit	Master carton
K1V	1mm	37mm	piece	100 pcs	100 pcs
K2V	2mm	37mm	piece	100 pcs	100 pcs
K3V	3mm	37mm	piece	100 pcs	100 pcs
K4	4mm	37mm	piece	120 pcs	120 pcs
K5	5mm	37mm	piece	120 pcs	120 pcs

- Plastic tile crosses for correct positioning of ceramic tiles and creating an even gap
- Length: 37mm
- Material: Polyethylene

TILE STICKS, 200 PIECES

Code	Length	Unit	Pack unit	Master carton
KAPV	30mm	piece	25 pcs	250 pcs

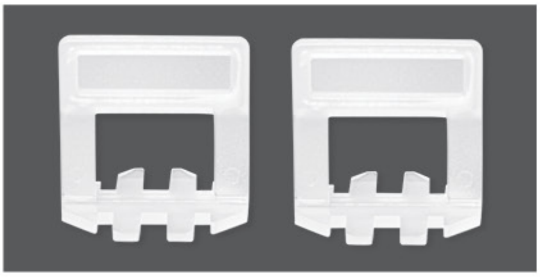
- Plastic tile sticks for correct positioning of ceramic tiles and creating an even gap
- Material: Polyethylene

TILE LEVELING WEDGES, 100 PIECES

Code	Length	Unit	Pack unit	Master carton
NK-100	92mm	piece	15 pcs	15 pcs

- Tile leveling wedges
- Simple, fast, and precise installation
- Used with products NS1-100, NS1.5-100, NS2-100 and NS3-100 depending on the desired grout thickness
- Suitable for tiles with a thickness of 4-10mm
- Can be reused

LINEAR SPACERS, 100 PIECES



Code	Width	Unit	Pack unit	Master carton
NS1-100	1mm	piece	25 pcs	25 pcs
NS1.5-100	1.5mm	piece	25 pcs	25 pcs
NS2-100	2mm	piece	25 pcs	25 pcs
NS3-100	3mm	piece	25 pcs	25 pcs

- Linear spacers are part of the leveling system used to assist tile leveling wedges during tile installation
- Simple, fast, and precise installation
- Used with wedges NK-100
- Suitable for grout joints of 1mm and tiles with a thickness of 4-10mm, as well as any tile surface

COMPLIANCE
CERTIFIED TO STANDARD
EN131

- The ladder is made of kiln-dried, knot-free Canadian poplar (8–10%), a wood that is significantly lighter and more flexible than pine and beech, which are used for most ladders from European manufacturers
- Ladders are thicker than those from European manufacturers. They feature 50 x 30 mm rungs, while most European manufacturers use 50 x 20 mm rungs
- The third rung is wider for added stability, measuring 60 mm
- The ladder is equipped with non-slip rubber feet for added safety and to protect the floor
- The joints between the wooden parts are considerably more robust: they consist of 14 x 20 mm strips that extend 20 mm into the foot and are glued in place. With most European manufacturers, the connection is two-part, without glue, and protrudes only 12 mm into the foot
- The ladder is equipped with a bucket hook, which can be added optionally as needed
- The ladder features a safety bar with a reinforced nut to prevent the screw from loosening, and a spacer to prevent the ladder from wobbling during transport

MAXIMUM LOAD **150 kg**
